JOURNAL OF MARINE SYSTEMS

Contents Volume 14, 1998

Production of monthly mean climatological archives for the Nordic Seas
H. Engedahl, B. Ådlandsvik and E.A. Martinsen 1
The importance of the "Polar Front" as a foraging habitat for guillemots *Uria* spp. breeding at Bjørnøya, Barents Sea
F. Mehlum, N. Nordlund and K. Isaksen 27
Bacterial utilization of glucose in the water column from eutrophic to oligotrophic pelagic areas in the eastern North Atlantic Ocean
A. Bianchi, F. Van Wambeke and J. Garcin. 45
Wind forced oceanic responses near ice edges revisited
W. Fennel and O.M. Johannessen 57
Simulating large scale transport of suspended matter
J. Segschneider and J. Sündermann 81
A numerical study of the formation of the Rhône River plume
P. Marsaleix, C. Estournel, V. Kondrachoff and R. Vehil 99
Vorticity analysis of transient shallow water eddy fields at the river plume front of the River Elbe in the German Bight
J.W. Dippner 117
Spatio-temporal variability of the thermohaline and biogeochemical properties and dissolved organic carbon in a coastal embayment affected by upwelling: the Ría de Vigo (NW Spain)
M.D. Doval, E. Nogueira and F.F. Pérez 135
Modelling the thermal stratification in the North Sea
K. Warrach 151
Bottom shear stresses and velocity profiles in stratified tidal planetary boundary layer flow from similarity theory
D. Myrhaug and O.H. Slaattelid 167
Competition between different groups of phytoplankton for nutrients in the southern North Sea
J.W. Dippner 181

Announcement 199

Special Issue

Abyssal Seafloor Waste Isolation: A Technical, Economic, and Environmental Assessment of a Waste Management Option

Edited by

P.J. Valent and D.K. Young

Introduction 201

Abyssal seafloor waste isolation: the concept
P.J. Valent, D.K. Young, W.B. Sawyer and T.D. Wright 203
Bathymetry (Part I), sedimentary regimes (Part II), and abyssal waste-disposal potential near the conterminous United States
F.A. Bowles, P.R. Vogt and W.-Y. Jung 211
Identification of potential sites for deep-ocean waste isolation with a geographic site-selection model
P. Fleischer, F.A. Bowles and M.D. Richardson 241
Engineering concepts for the placement of wastes on the abyssal seafloor
P.J. Valent, A.W. Palowitch and D.K. Young. 273

Cost assessment for abyssal seafloor waste isolation
D. Jin and H.L. Kite-Powell 289
Hydrodynamical dispersion of dredged materials sequestered on the abyssal seafloor
P.C. Gallacher and P.J. Hogan 305
Effects of waste disposal on benthic faunal succession on the abyssal seafloor
D.K. Young and M.D. Richardson 319
Organic carbon cycling in abyssal benthic food chains: numerical simulations of bioenhancement by sewage sludge
G.T. Rowe 337
Geochemical impacts of waste disposal on the abyssal seafloor
R.A. Jahnke 355
Policy, law, and public opposition: the prospects for abyssal ocean waste disposal in the United States
H.L. Kite-Powell, P. Hoagland and D. Jin 377
